

# ZM39 - Discreet Mount Right Angle AXIS P1265

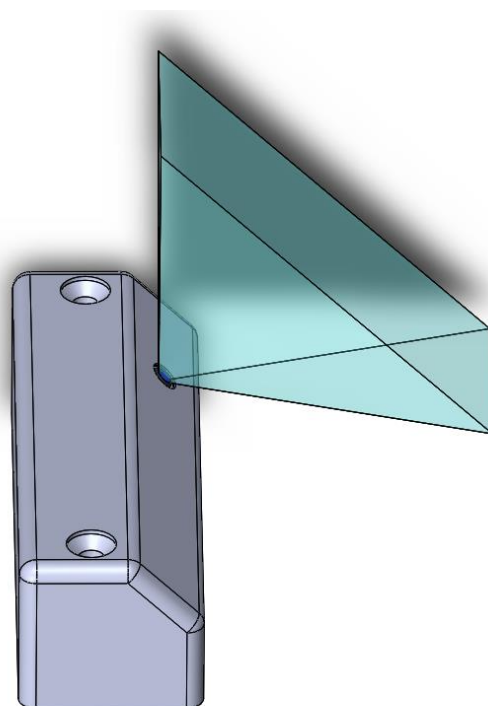

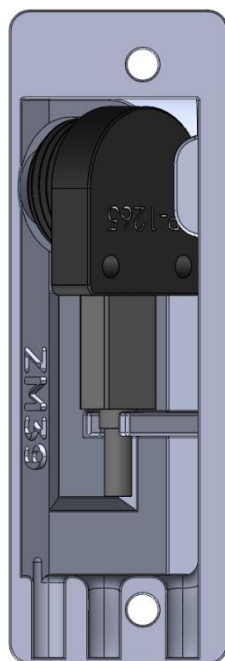

This mount is designed for the pinhole cameras AXIS P1265 and FA1125. These cameras provide video with 91x45° viewing angle.

The design offer a discreet way to mount a camera, e.g. in a doorway, to get good face shots, even when the person is wearing a baseball cap or a hood. The mounts are designed to be placed, in eye level, next to e.g. doors or alarm panels. The camera will look straight into a person's face. It is ideal anywhere when reliable identification is necessary.

The cable may be routed through the wall or along the wall.

*The product shown here  
is dyed brown.*

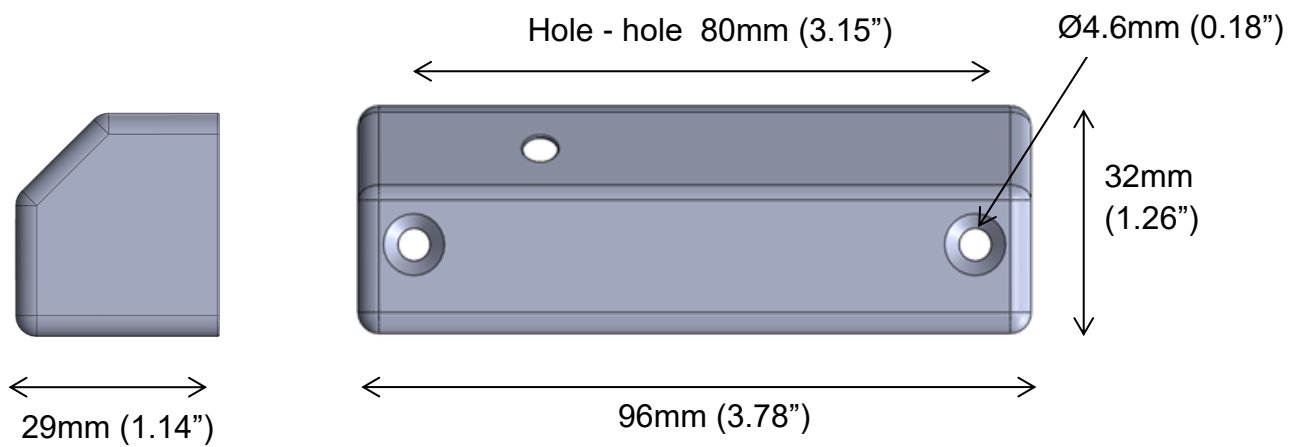

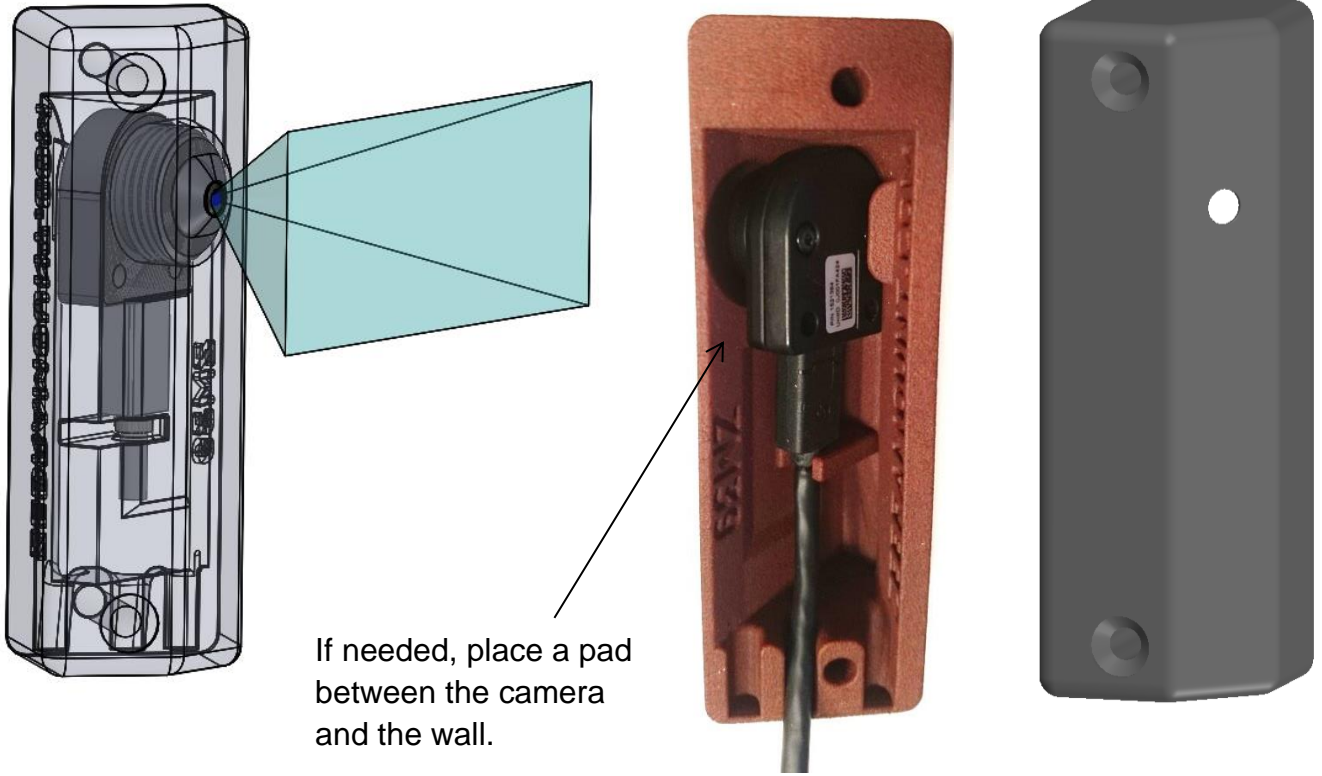

Note, that a mirrored version is also available. Part no. ZM38.
